AGENDA

EUROPE'S RAIL : INFORMATION SUR LE PARTENARIAT FRANÇAIS

➤ 14h00 – Accueil / Introduction de la session

- Jean-Marc ZACCARDI, Ministère de l'Enseignement Supérieur, de la Recherche et de l'Innovation
- Bertrand MINARY, i-Trans/Railenium
- Jean-Jacques MOGORO, FIF, Responsable Technique et Innovation

➤ 14h15 – Le programme national français de Recherche & Innovation ferroviaire

- Jean-Marc ZACCARDI, Ministère de l'Enseignement Supérieur, de la Recherche et de l'Innovation

➤ 14h30 – Le partenariat Europe's Rail

- Carlo BORGHINI, Executive Director Europe's Rail Joint Undertaking

➤ 15h30 – Grands attendus et retour d'expérience Shift2Rail

- Laurent NICOD, Alstom Group, ERJU Flagship Area 4 European Coordinator
- Christophe CHERON, SNCF/DTIPG – Direction Interopérabilité, normalisation et recherche Europe

➤ 15h50 – L'accompagnement des acteurs français

- Ludivine DELOUX, i-Trans, Directrice opérationnelle

➤ 15H55 – Conclusion

- Jean-Marc ZACCARDI, Ministère de l'Enseignement Supérieur, de la Recherche et de l'Innovation
- Bertrand MINARY, i-Trans/Railenium
- Jean-Jacques MOGORO, FIF, Responsable Technique et Innovation

i-TRANS et IRT RAILENIUM

Action territoriale aux niveaux régional, national et européen

Animer l'écosystème

- Pilotage interactif de la feuille de route
- Clubs d'intérêt thématiques
- Mises en relation partenariales
- Webinaires et les forums
- Veille stratégique et technologique

Accompagner les projets

- Support au montage des projets
- Recherche de partenaires projet
- Orientation vers le guichet de financement
- Contribution à la réalisation des projets
- Support à la valorisation

Labelliser

- Favorise l'accès au financement
- Présentation selon le guichet
- Expertise confidentielle préalable
- Analyse par un comité associatif
- Lettre de labellisation valorisante

Le programme européen pour la recherche et l'innovation

Le programme national français de Recherche & Innovation ferroviaire

Pierre Pacaud, Jean-Marc Zaccardi
(MESRI)

pierre.pacaud@recherche.gouv.fr

jean-marc.zaccardi@recherche.gouv.fr

Les orientations de la R&I sur le domaine ferroviaire, en réponse aux politiques publiques et la compétitivité de la filière, s'appuient sur le **contrat de filière ferroviaire** :

a. Transition écologique

- Accélérer le développement du train à hydrogène
- Développer des systèmes de trains légers pour les petites lignes ferroviaires
- Déployer le train à batterie
- Renforcer la décarbonation des procédés industriels

b. Compétitivité et souveraineté

- Promouvoir l'industrie ferroviaire en France à travers la commande publique
- Renforcer la souveraineté industrielle en soutenant le tissu industriel local
- Soutenir l'effort des entreprises à l'export

c. Cohésion, compétences et emploi

d. Relations de solidarités intrafilière

Rôle clé de l'innovation

Portefeuille d'innovations

Feuille de route (2021 – 2027)

| | Description |
|--|---|
| Transition écologique et décarbonation de la filière | <ol style="list-style-type: none">1. Développer des matériels roulants de voyageurs utilisant une énergie décarbonée2. Développer un matériel roulant FRET utilisant une énergie décarbonée3. Améliorer l'empreinte écologique des matériels roulants existants4. Optimiser l'empreinte écologique du réseau |
| Protection sanitaire et sûreté | <ol style="list-style-type: none">1. Développer de nouvelles solutions de sécurité sanitaire et modéliser les flux de voyageurs2. Améliorer la sécurité des personnes |
| Nouvelles solutions technologiques au service de la performance et de la compétitivité | <ol style="list-style-type: none">1. Améliorer le partage de données sur la chaîne FRET2. Développer le train à sustentation magnétique3. Digitaliser les opérations ferroviaires, métro et tram4. Développer l'intelligence artificielle pour optimiser les opérations5. Développer les systèmes de gestion par jumeau numérique6. Promouvoir l'innovation technologique et les compétences associées au sein de la filière ferroviaire |
| Matériel roulant et service du futur | <ol style="list-style-type: none">1. Promouvoir le développement du train de voyageurs autonome2. Développer de nouvelles gammes de matériel roulant TGV3. FRET - Proposer de nouveaux matériels et services aux clients du transport conventionnel et combiné |
| Train léger et nouvelles mobilités partagées | <ol style="list-style-type: none">1. Lignes de desserte fine du territoire : gamme de trains légers modulaires et frugaux2. Nouvelles mobilités pour les territoires |
| Robustesse et adaptabilité du réseau ferroviaire digitalisé | <ol style="list-style-type: none">1. Adapter le réseau Français aux standards du futur2. Digitaliser / automatiser le réseau national3. Protéger des réseaux ferroviaires digitalisés |

FRANCE 2030 : Sanctuarisation budgétaire et intégration du PIA4
pour atteindre une masse budgétaire de 54 Md€

L'innovation « DIRIGÉE »

40,5 Md€

OBJECTIF : Soutenir des priorités d'investissements stratégiques qui répondent aux grands enjeux de transition de notre économie et de notre société.

PAR OBJECTIFS ET LEVIERS DE FRANCE 2030

(Les stratégies nationales financées par les crédits de la mission « investir pour la France de 2030 » (hydrogène décarboné, cybersécurité, enseignement et numérique, alimentation...) sont intégrées aux objectifs et leviers de France 2030.

EUROPEAN RAIL TRAFFIC AND MOBILITY MANAGEMENT

DIGITALISATION & AUTOMATION IN TRAIN OPERATIONS

SUSTAINABLE AND DIGITAL ASSETS

COMPETITIVE, DIGITAL, GREEN RAIL FREIGHT

REGIONAL RAIL SERVICES IN LOW DENSITY AREAS

Manage and improve rail traffic at EU level
Adjust rail traffic management in function of the mobility demand

ATO implementation
Digital train operations

Integrated assets testing & life-cycle framework
Zero-emission, silent rail system

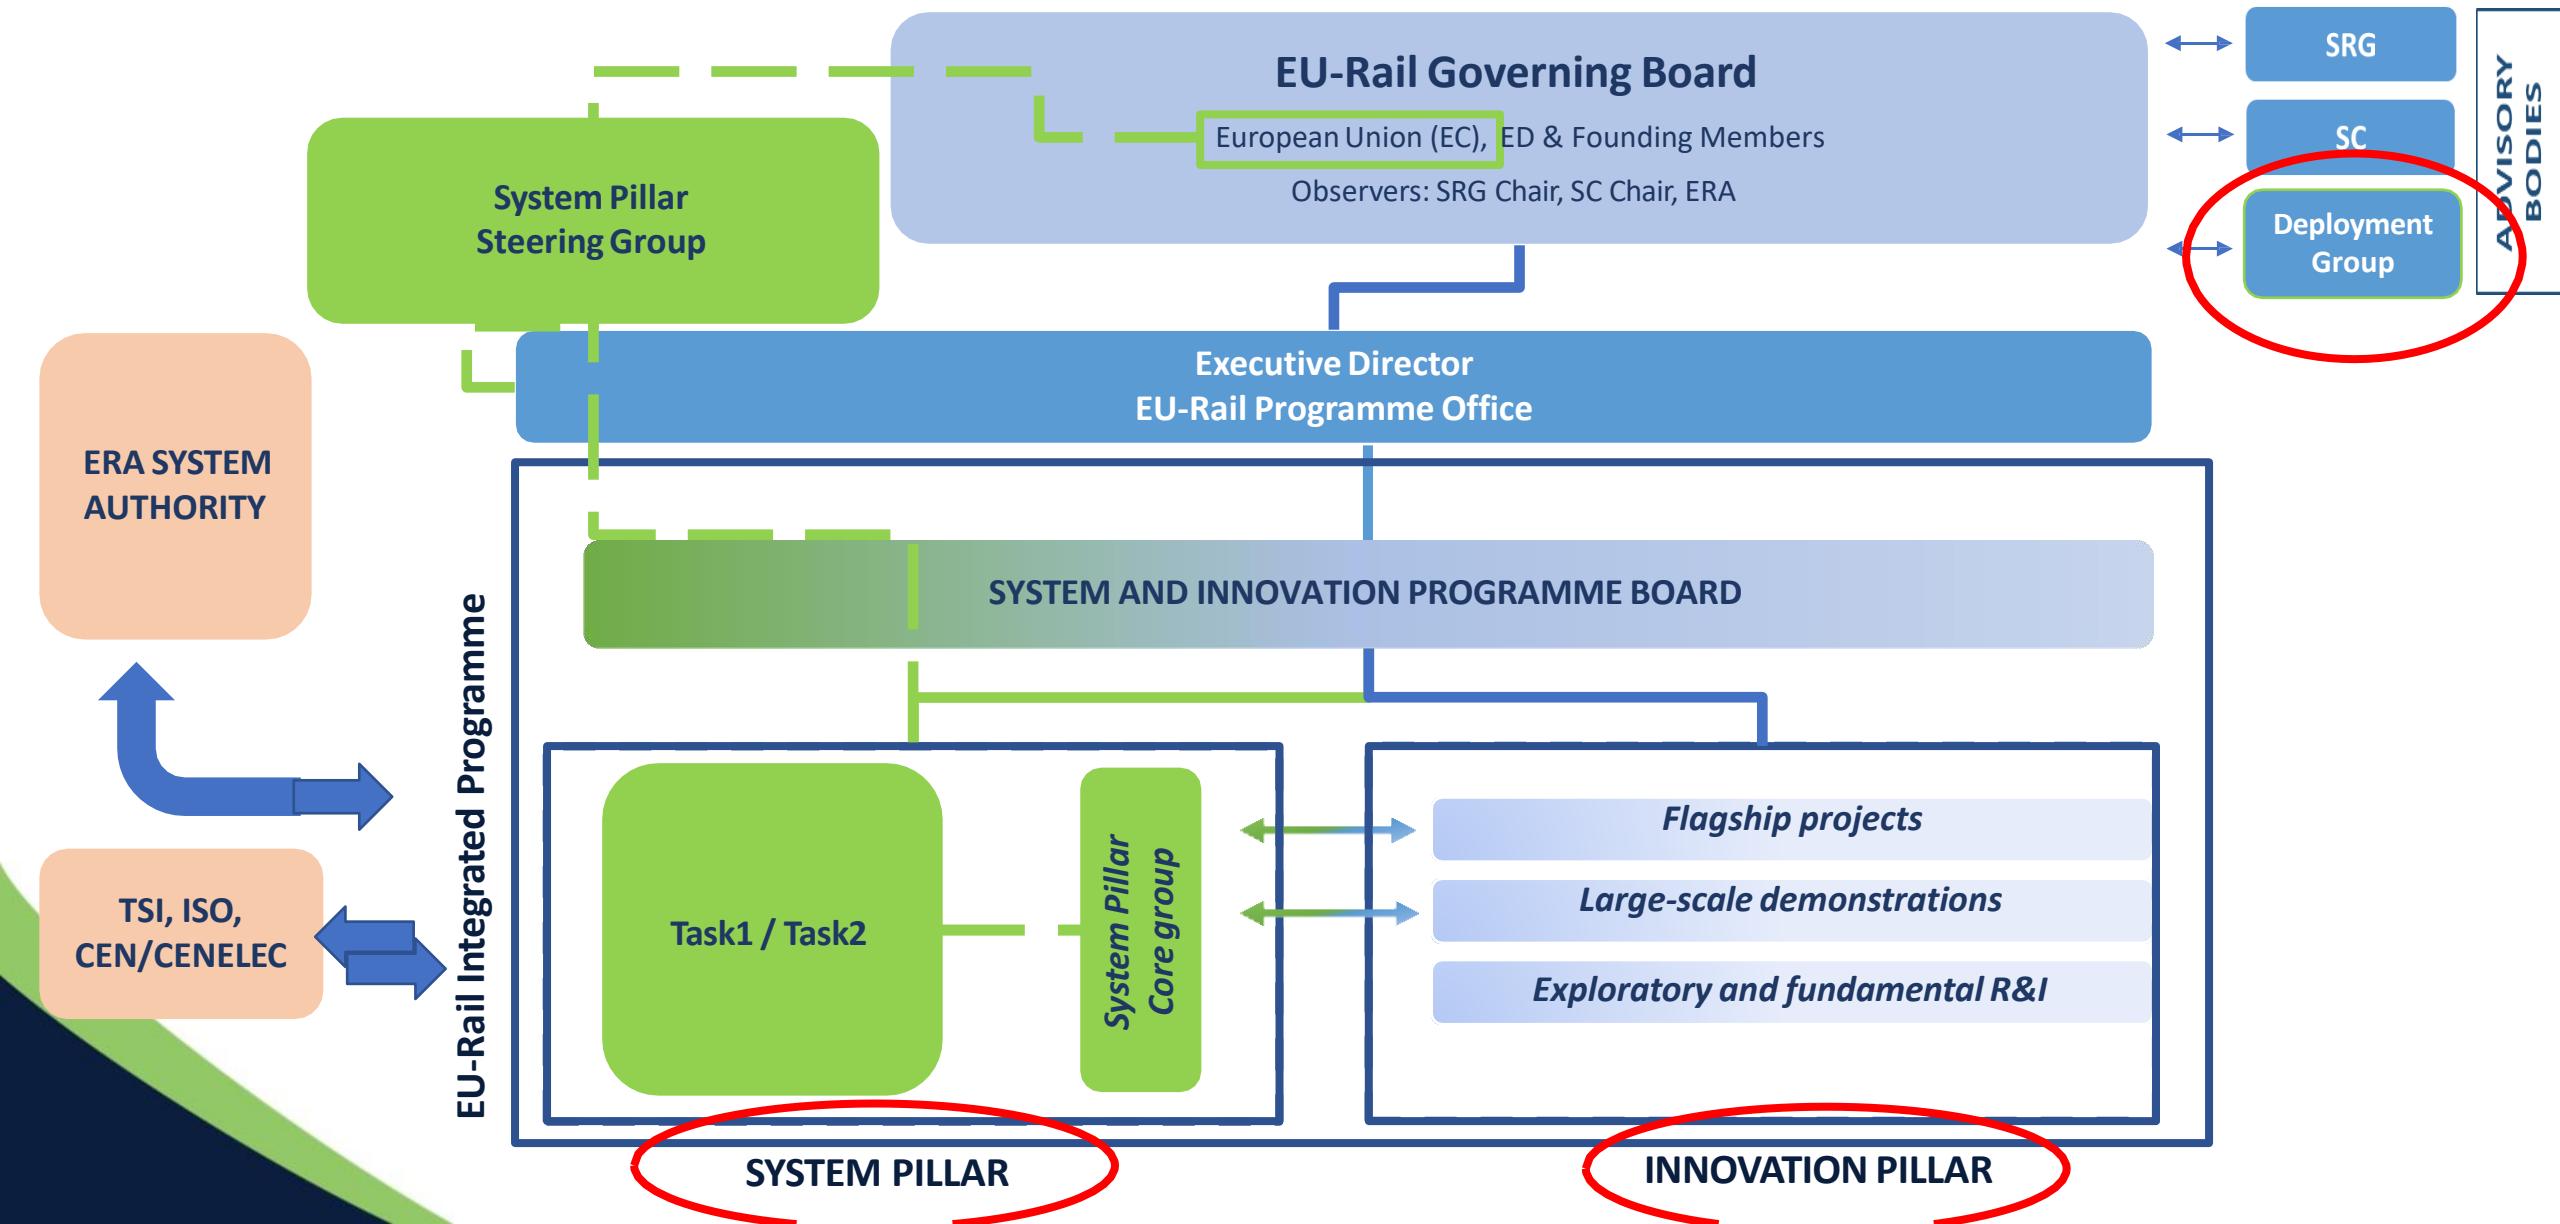

New digital customer interaction & innovative rail freight services
Multimodal and rail freight innovation integration

New system approach to regional rail services in low density areas

DEPLOYMENT GROUP

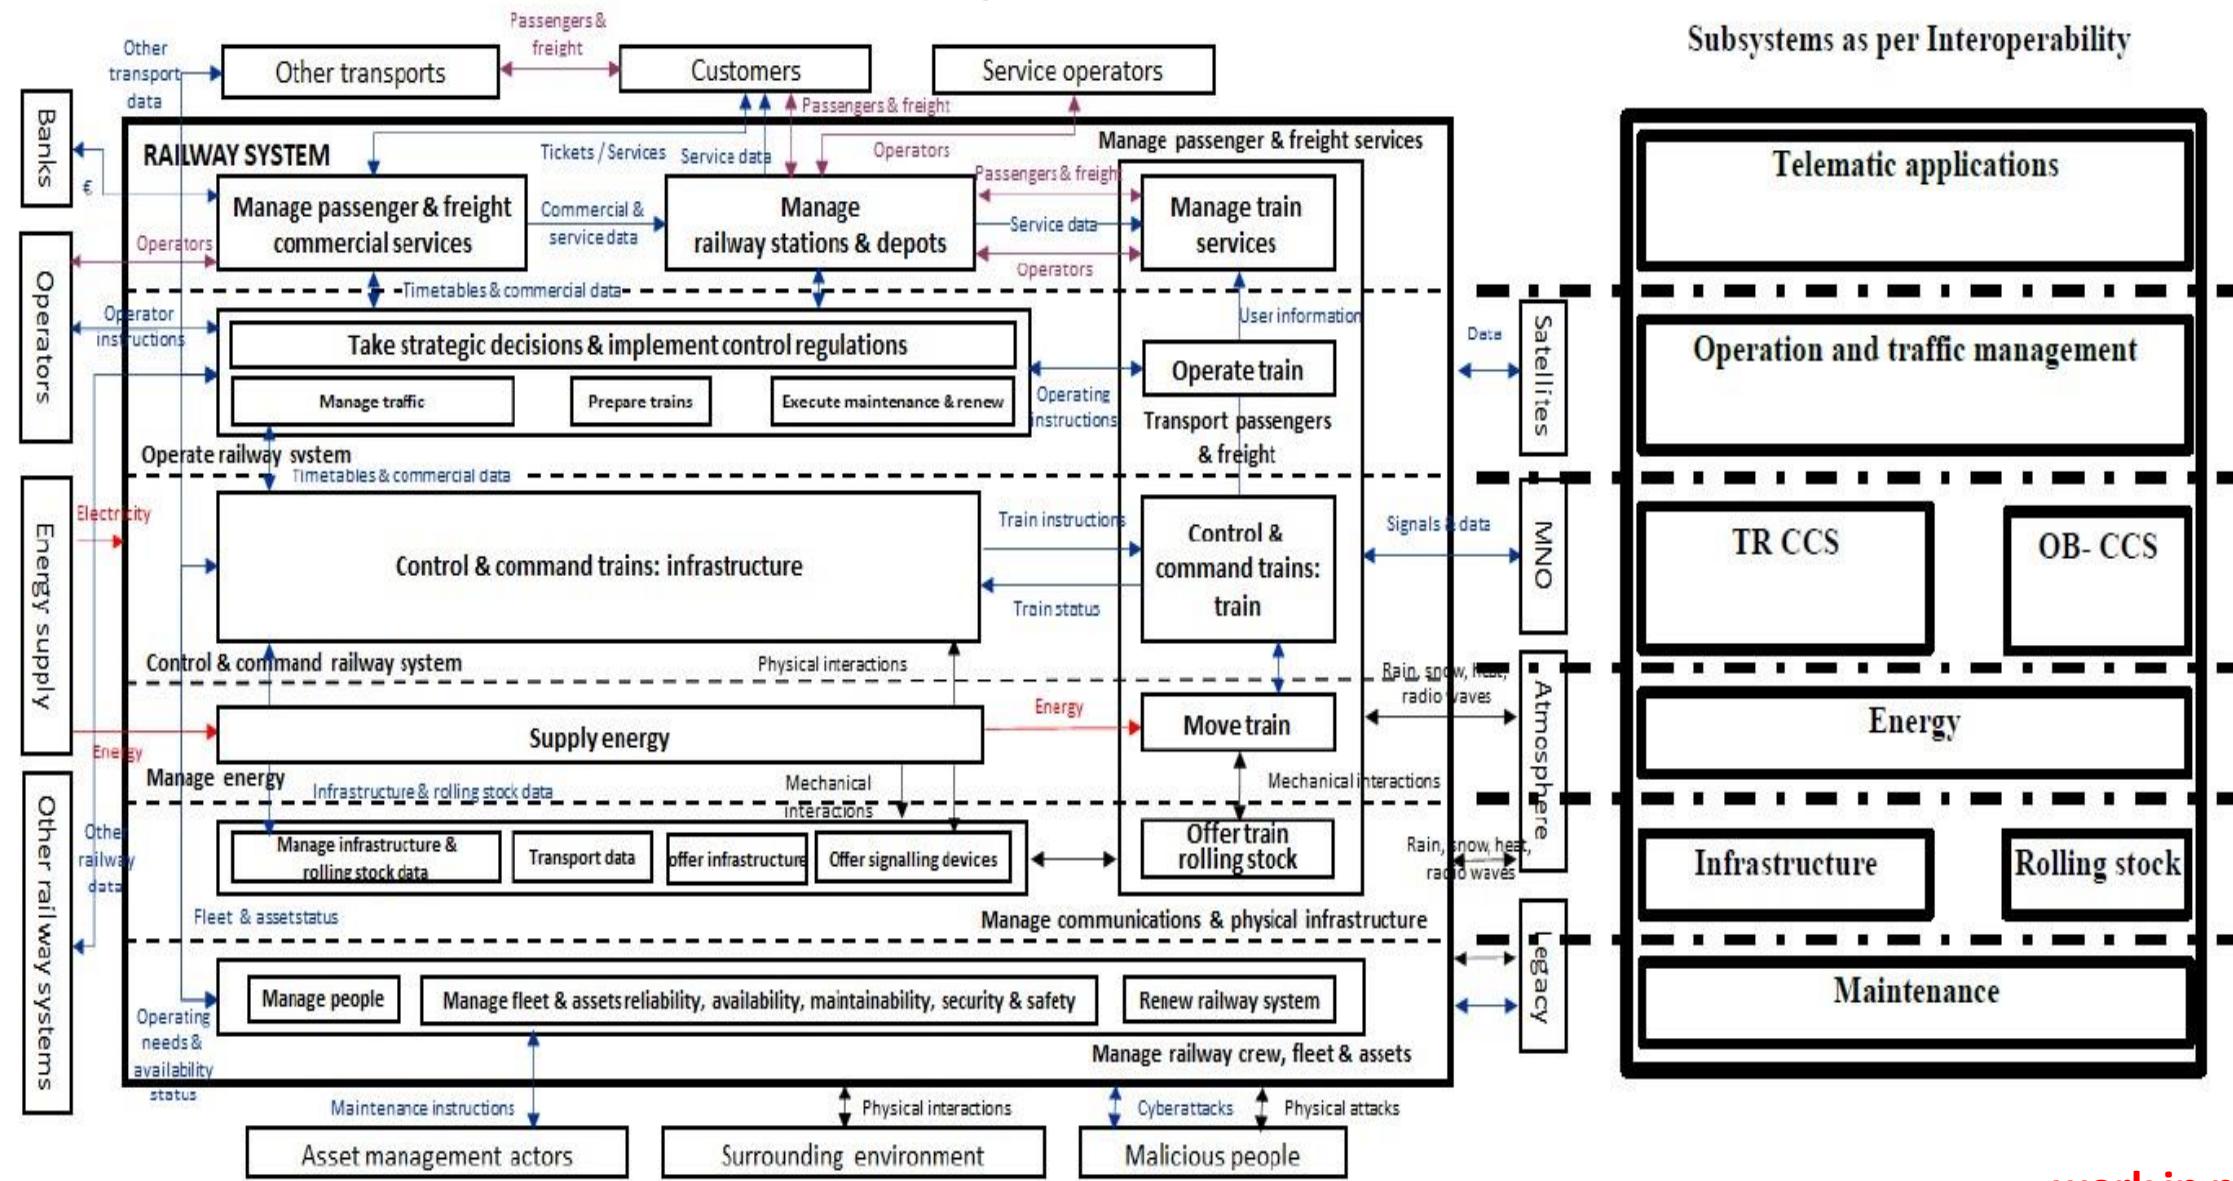

FUTURE SOLUTIONS DEPLOYED IN A COORDINATED AND CONSISTENT WAY AT EUROPEAN LEVEL, TAKING INTO ACCOUNT ALTERNATIVE ROLLOUT SCENARIOS, BEHAVIOURAL AND ORGANISATIONAL CHANGES, SYNERGIES WITH OTHER MODES OF TRANSPORT

Governance

System Pillar

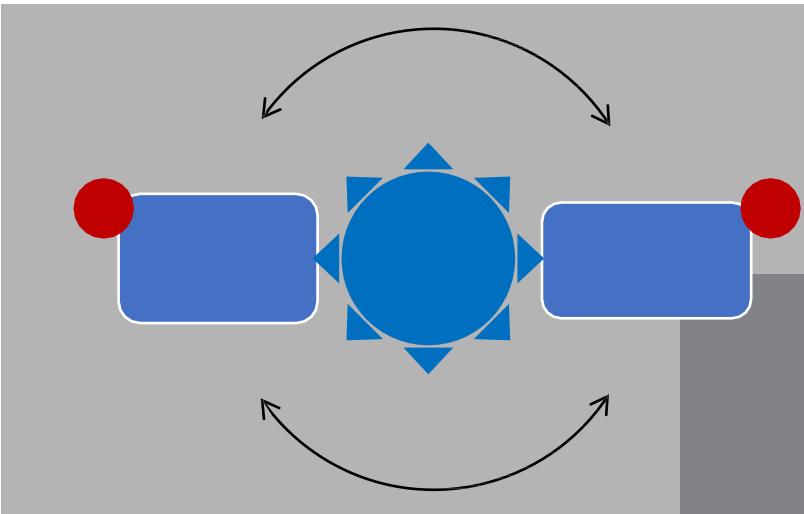

domains of the railway system and their alignment with sub systems

work in progress

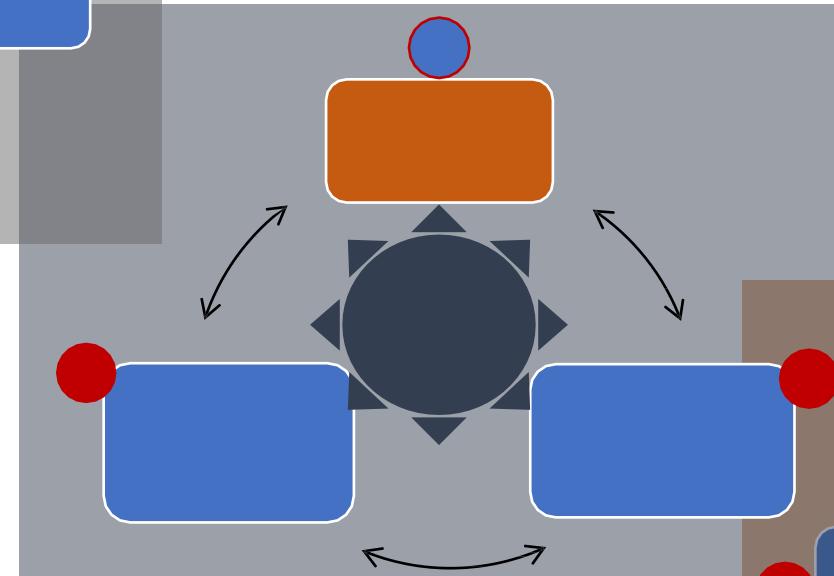

Innovation Pillar

objective: deliver multimodality

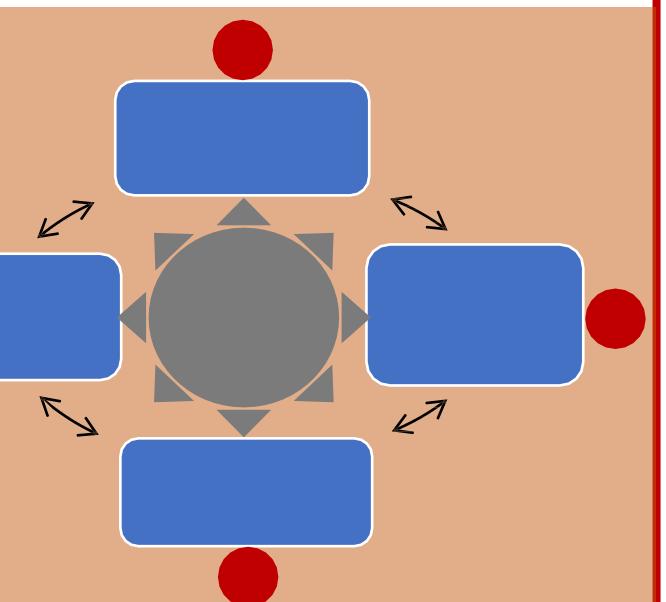

A coherent framework improves the system impact of R&I activities and ensures a one European integrated system

objective: Integrated European transport networks

objective: delivering European rail industry competitiveness

Large scale demonstrations accelerate opportunities for better services, operations and assets

Key Performance Indicators of the Shift2Rail Programme

EU-Rail Work Programme 2022 2024 Budget

| Year 2022 | Type of call | Value of the actions | Maximum EU-Rail co-funding | Non-funded activities | Target contributions from Members in case of award | Indicative publication date |
|---|--------------|----------------------|----------------------------|-----------------------|--|---|
| Multi-annual Call for Proposals | Open | 390.0 | 234.0 | 156.0 | 302.0 | Q1 |
| Call for Proposals—Exploratory Research | Open | 14.5 | 12.5 | 2.0 | 4.3 | Q3 |
| Call for Tenders | Open | 15.5 | 13.7 | 1.8 | 0.0 | Q1–Q4 & implementation of new and ongoing contracts/framework contracts |

EU-Rail Call 2022-1

| DESTINATION Topics | Type of Action | Expected TRL | Expected EU contribution per project (EUR million) | Number of projects expected to be funded |
|--|----------------|--------------|--|--|
| Opening: 10 March 2022 - Deadline: 23 June 2022 | | | | |
| HORIZON-ER-JU-2022-FA1-TT-01 | IA | 5 to 7 | 38.0 | 1 |
| HORIZON-ER-JU-2022-FA2-01 | IA | 5 to 7 | 54.3 | 1 |
| HORIZON-ER-JU-2022-FA3-01 | IA | 5 to 8 | 46.3 | 1 |
| HORIZON-ER-JU-2022-FA4-01 | IA | 5 to 7 | 38.3 | 1 |
| HORIZON-ER-JU-2022-FA5-01 | IA | 5 to 8/9 | 40.6 | 1 |
| HORIZON-ER-JU-2022-FA6-01 | IA | 5 to 7 | 16.5 | 1 |

Call structure (see also annex VII of the EU-Rail [Work Programme 2022-2024](#)):

- ❖ **Destination:** indicates the objectives as well as clear and quantified targets in term of KPIs to be reach with the R&I activities.
- ❖ **Expected outcome:** describes the expected demonstrations, the expected preparatory works to be launched for the future set of demonstration foreseen in the MAWP and the **input/output expected with the linked actions** from other Destinations.
- ❖ **Scope:** identifies the expected capabilities/enablers that should be developed through R&I activities for achieving the expected demonstrators. It also highlight other requirements, as the need to **measure and monitor KPI, contribute to standards and interact with the System Pillar activities**.

Europe's Rail Work Programme 2022 2024

EU-Rail call topic 2022 “Destinations”:

The 1st call destination 2022 covers FAs 1 to 6 + the TT activities at about 50% of their planned activities.

They have clear demonstration targets by 2025 and all proposals shall also cover in 2026 important preparatory works needed to be launched for the future set of demonstration foreseen in the Multi-annual Work programme in view of the evolutions of the solutions

The following is an overview of the expected outcome in term of demonstration in 2025 for each of the 1st topic call “Destinations”, including their TRL

Europe's Rail Work Programme 2022 2024

DESTINATION 1 – Network management planning and control & Mobility Management in a multimodal environment and Digital Enablers

WS1: Network management planning and control & Mobility Management in a multimodal environment
deliver by 2025 innovative solutions to be demonstrated with:

- Tactical and short-term timetable planning including cross-borders with improved models and functions; use of decision support to support integrated capacity planning of the rail network and operations for yards, stations, terminals **[TRL6/7]**;
- HMI for TMS with decision support modules, based on User Experience (UX) Design and human-in-the-loop awareness **[TRL6-8]**
- Demand-driven predictions to improve operations and service offers, considering information about events across modes. Effect of cross-regional, multimodal travels in combination with demand forecast and disruption handling on improvement of daily operations, benefit on customers (accessibility and attractiveness). **[TRL 7-8]**

Europe's Rail Work Programme 2022 2024

DESTINATION 1 – Network management planning and control & Mobility Management in a multimodal environment and Digital Enablers

WS2: Digital Enablers

deliver by 2025 the following outcome:

- Develop data federation, access and processing services through standardized interfaces
- Based on the outputs and toolset developed within LinX4Rail, a common machine-readable domain ontology must be developed to structure the data unambiguously across all systems participating in data sharing
- Ensure a powerful, secure and reliable data and communication infrastructure.

Europe's Rail Work Programme 2022 2024

DESTINATION 2 – Digital & Automated up to Autonomous Train Operations

deliver by 2025 at least the following:

- Demonstrate technical and functional enablers such as ATO GoA3/4 over mixed radio based ETCS levels (**TRL7 or higher**), Hybrid Level 3, moving block and TIMS (**TRL6**), connectivity (**TRL7**), perception (**TRL6**), train positioning (**TRL6**), automated functions and digital register (**TRL6**).
- Demonstration of the remote driving and command in depots and yards, including perception systems (**TRL6**).
- A first demonstrator on next generation ATC, with modular onboard and trackside ATC architectures, at proof-of-concept stage, in close collaboration with the EU Rail System Pillar.
- A proof-of-concepts and/or validation in laboratory and field (i.e., up to **TRL5 in Lab and TRL6 on site**) for the following new functions and technical enablers:
 - Virtual Coupling Train Set
 - Self-driving wagon
 - autonomous path allocation (linked to input from Destination1)
 - validation and certification
 - Demonstrate a Functional Open Coupling System prototype covering all required subsystems in an operational environment (**TRL7**)
 - Demonstrate a modular hardware platform using architectural software design patterns and methods (**TRL7**) allowing SIL2 respective SIL4 (depending on the application)

Europe's Rail Work Programme 2022 2024

DESTINATION 3 – Intelligent & Integrated asset management

deliver **by 2025** solutions that can be demonstrated by system approaches of the various developments targeting up to TRL 6 as European common integrated solutions, on :

- 1. Asset Management & TMS.** The main aim of the demonstrator shall be to show the integration between the Intelligent Asset Management System (IAMS) and the Traffic Management System (TMS) enabling the share of data and optimising decisions using common metrics – **TRL6**.
- 2. Asset Management & Rolling Stock.** The main objective of this demonstrator shall be to present the monitoring of rolling stock (including on board and wayside technologies) leading to decisions and planning of interventions, and redirecting rolling stock to workshops to execute the (re)scheduled work both manually as well as by new technologies and solutions to conduct inspection tasks automatically – **TRL6**.
- 3. Long Term Asset Management.** Development of Life Cycle Cost (LCC) models for infrastructure and rolling stock. This demonstrator shall include cross-border infrastructure remaining useful-life analysis and space-time cross-analysis and visualisation – **TRL6**.

Europe's Rail Work Programme 2022 2024

4. **Asset Management & Infrastructure.** The objective shall be to integrate on field and on board systems with central platforms capable of managing Big Data to enable prescriptive interventions, minimising dangerous situations and service disruptions during operation – **TRL6**.
5. **Asset Management & Digital Twins.** The focus shall be on design, maintenance, upgrade and renewal interventions driven by Digital Twins for the optimisation of processes, maintenance planning and involved logistics. This shall enforce the use of BIM to standardise system configuration and AI tools to execute simulations and predictions. The Digital Twin demonstrator shall include visualisation, prediction and simulation – **TRL7**.
6. **Design & Manufacturing.** This demonstrator shall be the showcase of eco-friendly production of resilient assets supported by new fabrication techniques such as additive manufacturing (focussed on infrastructure assets) – **TRL5**
7. **Robotics & Interventions.** The focus of this demonstrator shall be the showcase of high-tech automated execution solutions for construction and interventions supported by robotics and wearables, among other devices, building a safer and more automated railway environment.- **TRL5/6**

Europe's Rail Work Programme 2022 2024

DESTINATION 4 – A sustainable and green rail system

deliver by 2025 innovative solutions to be demonstrated by:

1. **Alternative energy solutions for the rolling stock at TRL6**, covering:
 - High performances Batteries Electric Multi-Unit (BEMU) train (reaching TRL6/7);
 - Hydrogen hybrid trains with test of heavy-duty inspection vehicle and loco for freight-passengers ;
 - Sub-urban catenary trains with on board Energy Storage Systems (ESS);
 - Auto adaptive train energy consumption to various services situations;
2. **A holistic approach to energy in rail infrastructure (design, production, use and intelligent management) at TRL6**, covering:
 - Rail Power Smart Grid in different systems as well as the integration of energy storage solutions;
 - Application of solutions for the production, storage and refuelling of hydrogen for railway vehicles on the example of a prototype refuelling station;
3. **Sustainability and resilience of the rail system** in a holistic approach to asset management, delivering more value:
 - Development of solutions and models for the reduction of noise and vibrations from railway infrastructure and rolling stock and to predict the effect of degradation, of maintenance and of noise perception (**TRL6**);

Europe's Rail Work Programme 2022 2024

5. **Improvement of electro-mechanical components and sub-systems for the rolling stock, at TRL6, covering:**
 - Technological solutions for the migration to the airless train: Electro-mechanical braking system and novel electro-mechanical pantograph and suspensions;
 - Optimised motors and gearboxes, high performance bogies, suspensions and new materials;
 - Eco-friendly HVAC system technologies;
 - Aerodynamic certification with experimental and numerical methods;
6. **Healthier and safer rail system, covering:**
 - Simulation tools for improving the air quality in trains, stations and tunnels (**reaching TRL7**);
7. **Attractiveness, at TRL6, covering:**
 - Modular rolling stock interiors providing easy access (incl. PRM) and new architectures for drivers' cabin.

Europe's Rail Work Programme 2022 2024

DESTINATION 5 – Sustainable Competitive Digital Green Rail Freight Services

WS1 Full digital Freight Train Operations with DAC as enabler for full digital freight train operation
deliver by 2025 the following demonstrators:

- **European full digital freight train operations: (TRL 8-9)** Large-scale demonstrator showing full digital freight train operations based on DAC Type 4 (incl. energy supply & data/communication solution and Type 5 upgradability, DAC wagon retrofitting and DAC – Hybrid for locomotives) in different regions with several train sets under real operational conditions including technical enablers described in scope section.
- **European full digital freight train operations: (TRL 7)** Proposals are expected to deliver a second demonstrator with a lower TRL level for technical solutions for parking brake system, digital wagon inspection (including rolling stock and infrastructure assets), DAC based telematic applications for customer requirements (goods monitoring) / for asset performance management /CBM / for safety related applications, distributed power system and electro-pneumatic brake.
- **European full digital freight train operations: (TRL 8 – some functionalities at lower TRL, see enabler section)** Demonstration of Yard automation equipment, wagon identity system allowing automated shunting, video gates and way side check points with visual recognition and AI tools for yard automation.

Europe's Rail Work Programme 2022 2024

DESTINATION 5 – Sustainable Competitive Digital Green Rail Freight Services

WS2 Seamless Freight: with easy access and reliable (intermodal) transport service offering digital solutions.
deliver by 2025 at least the following:

- **Seamless freight corridor (TRL 5-8)** The comprehensive innovations for planning and operation of cross-border freight trains should be demonstrated on (parts of) two European corridors. Freight specific pilot implementations of key enablers for improved cross-border timetable planning, management and path ordering systems taking into account also last mile service, as well as for real-time interaction between various TMS (including yards/terminals). Digital technologies for standardized European Railway checkpoints at borders or other operational stop points. Integrating and connecting the last mile (accession lines/shunting/yards/ terminals) slot planning directly or via interfaces.
- **Seamless customer freight (TRL5-8)** seamless planning, management and booking of multimodal rail-based transport integrating multi-actors, should be demonstrated integrating rail in modern supply chains. Improved routing engines more responsive to changing demand, disruptions and customer requirements. This demonstrator will ease end customers to interface with rail. Dynamic dispatching tools for the optimal automation of yards and last mile operations

Europe's Rail Work Programme 2022 2024

DESTINATION 6 – Regional rail services / Innovative rail services to revitalise capillary lines

deliver by 2025 demonstrations under the following scenarios:

1. Regional Railway System (CCS & Operations) Demonstration

- Demonstrate a single integrated Operations Control Center (OCC) covering interlocking, radio blocking and traffic management for regional lines that are not functionally/operationally connected with mainline (**TRL 4/5**)
- Demonstrate simple on-track radio network based on the findings in destination 2 related with cost effective communications, supporting all FRMCS applications, minimizing civil works and energy consumption, to the achievement of cost effective Gigabit Train, the use of public network coverage and compatibility with main lines (**TRL4/5**)
- Demonstrate a specific application for Traffic Management Systems for regional lines improving resilience of a connected rail network, optimizing train operations including disturbing events taking into account high/low-demand situations (disturbance and distraction) (**TRL 5**)

Europe's Rail Work Programme 2022 2024

DESTINATION 6 – Regional rail services / Innovative rail services to revitalise capillary lines

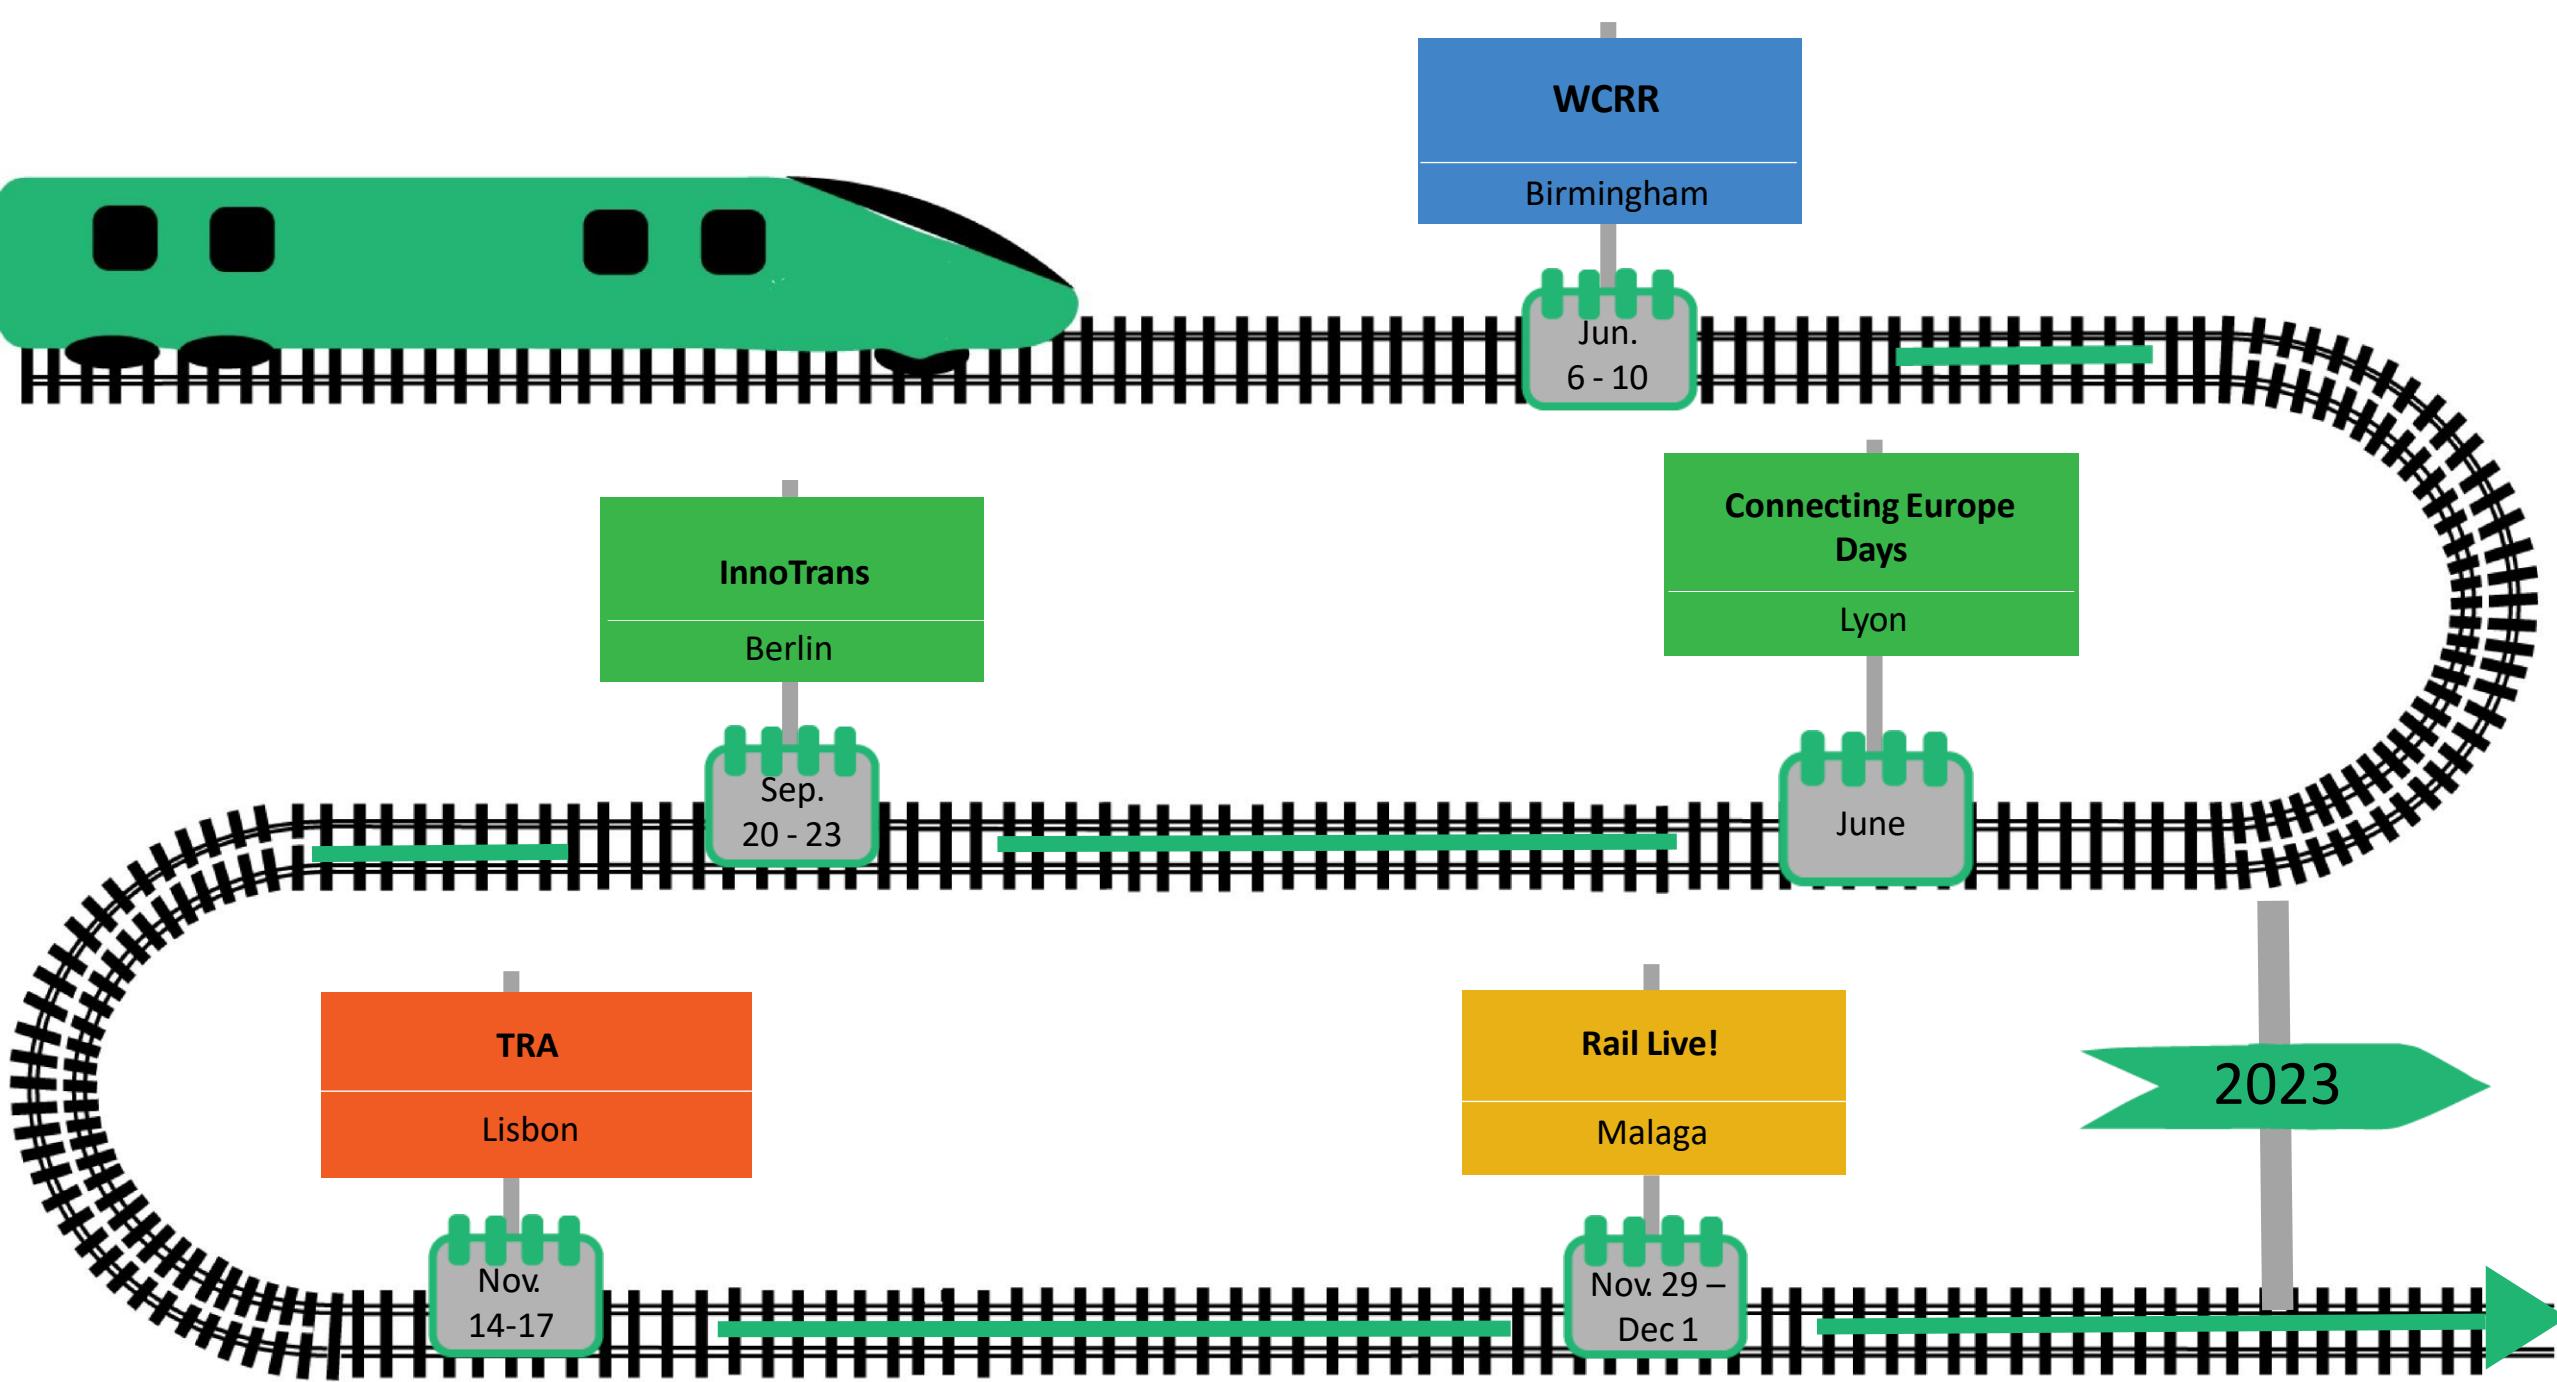

deliver by 2025 demonstrations under the following scenarios:

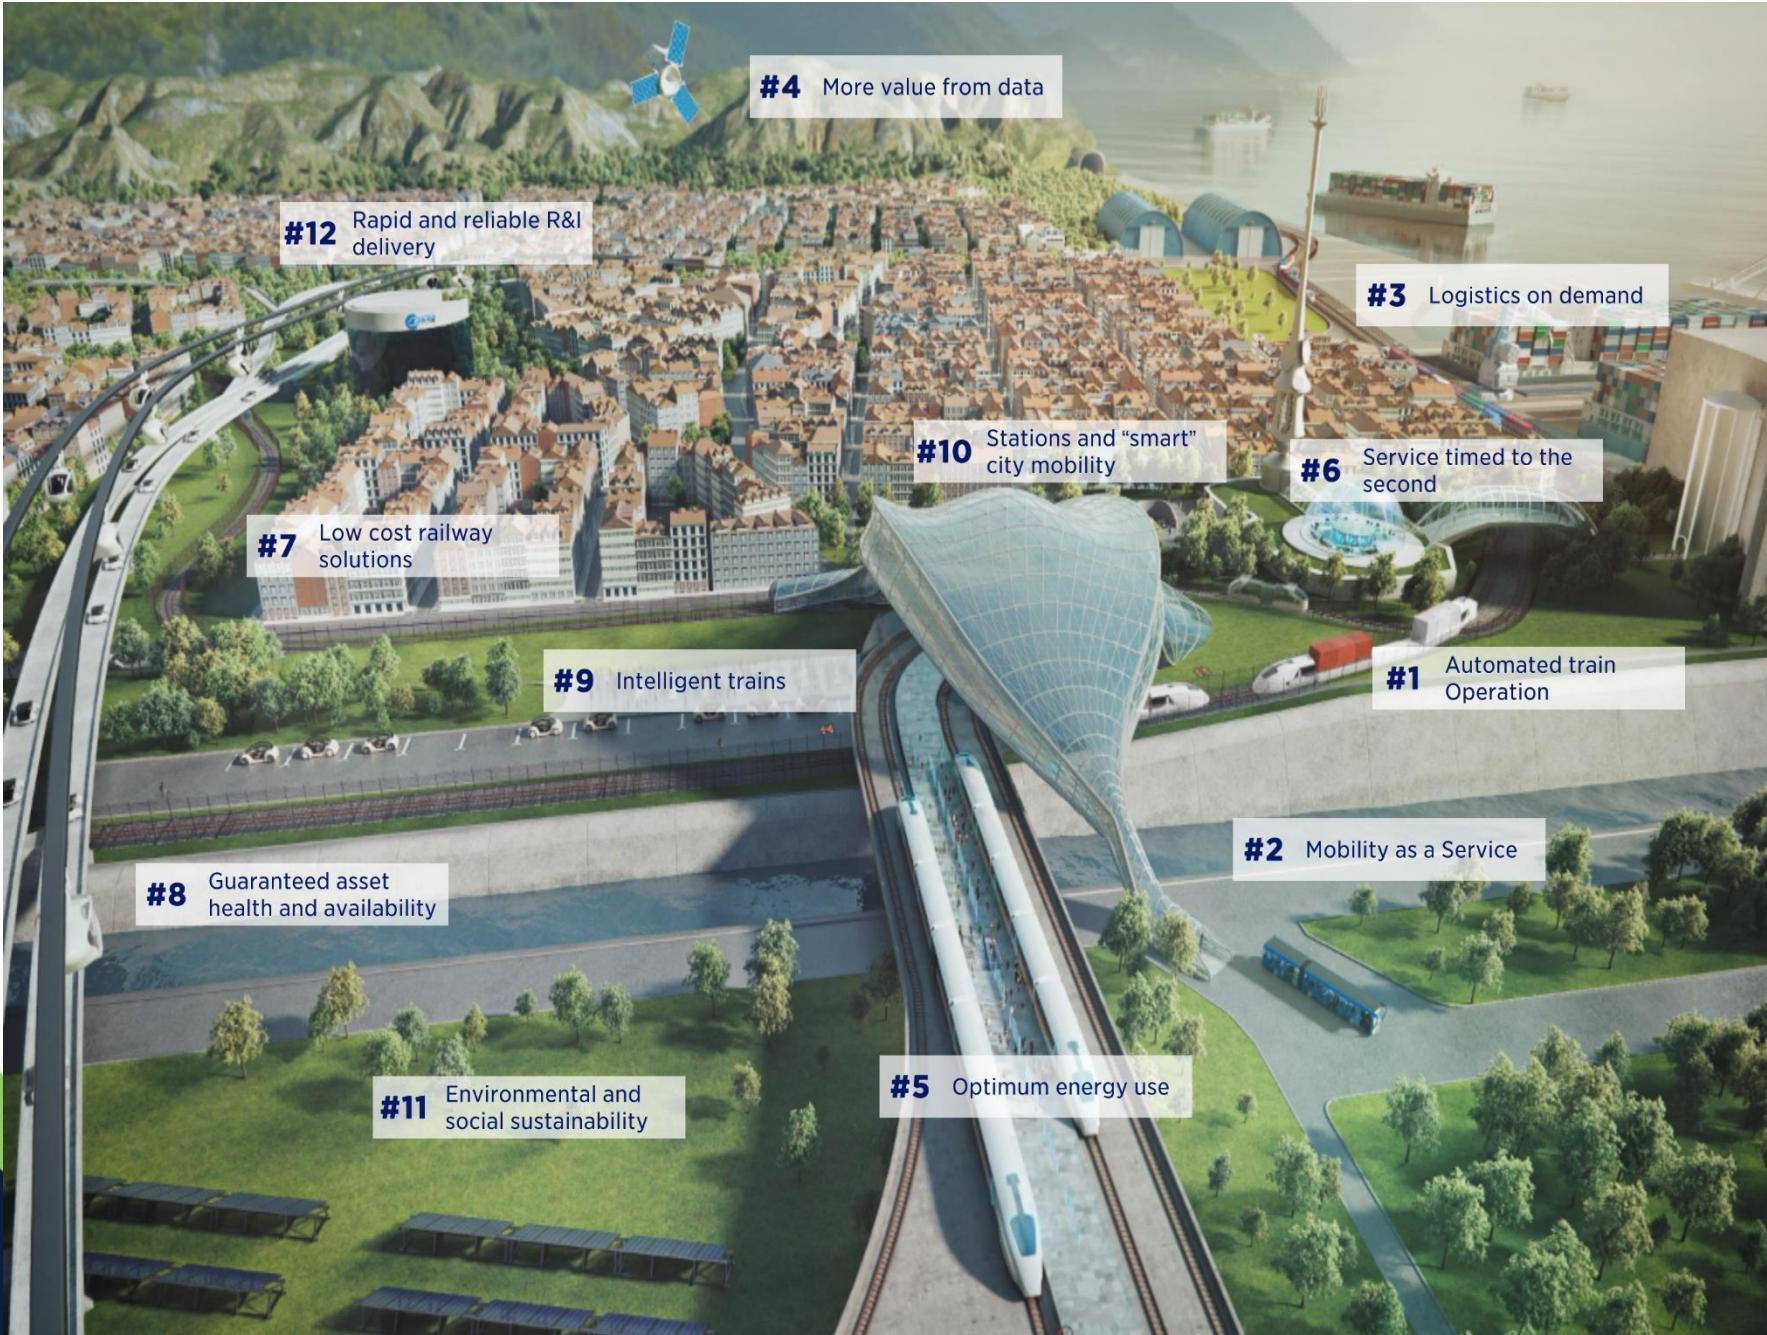

2. Assets Demonstration

- Demonstrate a systemic approach with the implementation of different railway assets in particular for cost-efficient wireless, energy self-sufficient wayside components in particular CCS track-side components (e.g. switches, level crossings) and if applicable for track vacancy detections and signalling shall be evaluated and demonstrated (**TRL4/5**)

3. Suitable customer services

- Demonstrate cost-efficient integration of on-board information of multimodal services integrating regional multimodal services such as carsharing (**TRL4/5**)
- Demonstrate passenger congestion rate monitoring, flow optimization application as well as a low-cost passenger information system for regional services developed within this action (**TRL4/5**)

26/04/2022

ERJU and S2R return of experience

- Innovation needed to achieve Transport decarbonisation/ fight against climate change
- ERJU crucial for our Sector
 - ▷ Reinforce European Rail competitiveness
 - ▷ Benefit all the markets in the world
- ERJU built on S2R success
 - ▷ S2R delivered key innovations in many fields including energy efficiency, ATO, digital maintenance
 - ▷ European platform for railway sector
 - Pre-standardisation debate
 - Cross sector fertilization : Operators/Industry/ academic research
 - European demonstrations & wide visibility

ERJU FA4 main Technical Enablers & state of play

- **Alternative energy** solutions for the rolling stock: Batt & H2 trains
 - Energy in rail **infrastructure**: flexible infra/renewable energy sources
 - **Sustainability and resilience** of the rail system: include circular economy
 - **Electro-mechanical components** and sub-systems for the rolling stock
 - **Healthier and safer** rail system : Air quality/Air treatment
 - Trains **attractiveness**: stimulate modal transfer
-
- Many demonstrations : hardware; software; Methods & Tools.
 - 18 KPIs: technical, environmental, economical (LCC incl. CO2)
 - Proposal submission: 23/6/2022
 - Start early 2023

DE SHIFT2RAIL À EUROPE'S RAIL

Financements européens (versus financements nationaux) pour le ferroviaire

- + définir les évolutions des exigences réglementaires, les spécifications normatives, publiques ou industrielles. C'est à minima à l'échelle européenne que s'articulent la réglementation, les normes et les standards industriels.
- + construire des démonstrateurs industriels, inévitables assemblages de briques technologiques issues de plusieurs acteurs différents.

De Shift2Rail à Europe's Rail pour le groupe SNCF

- + Présence de l'ensemble des acteurs significatifs du ferroviaire européen
- + Un investissement qui passe de 20 M€ à 55 M€
- + Des financements qui deviennent incontournables pour le groupe SNCF et préparer l'avenir
- + Une participation active aux différentes étapes de la construction de Europe's Rail

MERCI

ACCOMPAGNEMENT COMPLET

- **Orientation** et les **conseils** sur les dispositifs de **financement**
- **Appui pour les expérimentations** des solutions innovantes in situ
 - **Accompagnement sur mesure** de l'idée au marché

➤ Création d'opportunités d'échanges (ateliers, journées techniques, B2B...)

➤ Aide à la définition et à la construction du projet collaboratif
➤ Recherche de partenaires et mise en relation

➤ Conseils d'experts scientifiques et techniques
➤ Évaluation du projet et labellisation

➤ Recherche de cofinancements publics

➤ Suivi du projet en cours de réalisation

➤ Valorisation des projets terminés
➤ Accompagnement à la mise sur le marché

ANIMATEUR DE L'ÉCOSYSTÈME DES TRANSPORTS, DE LA MOBILITÉ ET DE LA LOGISTIQUE

TROPHÉES DE L'INNOVATION FERROVIAIRE 2022

i-Trans membre fondateur du réseau de clusters européens ERCI, organise pour la France la phase 1 de ce concours d'innovation ferroviaire.

Objectif : valoriser et honorer les compétences et savoir-faire des entreprises innovantes offrant des solutions permettant l'accroissement de la compétitivité de la filière ferroviaire.

Deadline : lundi 16 mai 2022

- Remise des prix nationaux pendant les Rail Industry Meetings ([+ d'infos](#)) et européen pendant Innotrans ([+ d'infos](#))
